Detailed Actions

1. Amendment received on 6/21/2006 is entered.

Claims 21,26,31,33 and 34 are amended.

Specification is amended.

Objections to Claims 21, 26, 31 and 33-34 are withdrawn.

Response to the arguments

2. Applicant argues in reference to rejection of Claims 21-34 under 35 U.S.C. 112, first paragraph that circuit shown on Fig. 10 "provides an example of a power supply circuitry for exemplary detection circuit 1000" and "not a part of connection between the AC plug (e.g. 1110) and the female outlet (e.g. 1160). Applicant also references to the Specification that states:" The female outlet 1160 includes a first, second and third conductor (conductors not shown) for connecting to the first, second and third conductors, respectively, of the AC plug 1110" (Page 18, Para. 0059). The rejection is withdrawn.

3. Applicant also argues reference to rejection of Claims 33-34 under 35 U.S.C. 112, first paragraph that the specification (paragraphs 0058 and 0061) provides sufficient information that enable one of ordinary skill in the art to make and/or use inventions of claims 33 and 34. The argument is convincing. The rejection is withdrawn.

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figure 11 shows a wiring error detection circuit (Fig. 10-11, Pos.1000) connected in series between the plug (Fig. 11, Pos. 1110) and the outlet (Fig. 11, Pos. 1160), but the Specification indicates the female outlet directly connected to the conductors of the AC plug. Corrected drawings should show how the wiring error detection circuit is connected to the conductors and to a conductor (Fig. 10, Pos. 1090). The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney of the application Mr. James Hwa on 8/04/2004.

5. The application has been amended as follows:
Cancel Claims 1-20.

Allowable Subject Matter

6. Claims 21-34 are allowed.

The following is an examiner's statement of reasons for allowance:

7. Independent Claim 21 is allowable because none of the prior art of record disclose a grounding module comprising a plug, an outlet and a wiring error detection circuit for providing the status of the wiring, wherein the module includes at least one external ground connection connected to the ground in combination with the other claim limitations.
Claims 22-34 are dependent on allowable Claim 21 and therefore allowable.

Comments to reasons for allowance

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to

Art Unit: 2836

avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
